

The continents of the world.

There are 193 recognised countries in the world. These countries are spread across 7 continents.

Did you know that the worlds population has risen above 8 billion?

Key Vocabulary	Definition
Continent	A continent is a large land mass. Most people agree that there are 7 continents in the world. A country is a region of land with its own government. Continents all have lots of different countries in.
Atlas	You can use an atlas to help you find where places are. Atlases have helpful contents pages and indexes. You can use these to look up what page of the atlas the country you are looking for is on
City	A city is a large town within a country, such as London or Manchester.
Physical Geography	Physical geography studies the Earth itself. It could include weather, mountains, rivers, oceans, seasons, rocks and climate zones.
Human geography	Human geography studies how people affect the environments they live in. It could include population, culture, religion, tourism, buildings and economic development.
Climate Zone	The climate of a country depends on where it in on the globe. Different climate zones have different weather patterns, animals and plants.

Fascinating Facts

The Yoruba people in the southwest part of Nigeria are known for giving birth to more twins than anywhere else in the world, at a rate of 50 per 1,000 births.

There are over 100 isolated tribes living in Brazil.

Tea is big in the UK. Locals reportedly drink 165 million cups a day. But it was a Portuguese woman who first brought the drink to the isles.

Mexico is home to many pyramids built by the Mayans and other ancient civilizations. But its least famous triangular structure is actually the largest one in the world.

Bread was invented in Egypt around 8,000 BC. The first examples of it were flat and unleavened, most closely resembling what we know today as chapatis in India or tortillas in Latin America.
